Technical Project Documentation

Technology stack, system architecture and delivered modules for the Invest Nova LG corporate web platform.

• PROJECT OVERVIEW

Technology Stack & Architecture

The Invest Nova LG corporate web platform is built on a modern production stack featuring server-side rendering, strict type safety and fully automated CI/CD deployment.

FRONTEND

- Next.js 16.2
- React 19.2
- TypeScript 5.x
- Custom CSS

INFRASTRUCTURE

- Vercel Cloud
- GitHub CI/CD
- Git main
- Edge Network

CAPABILITIES

- SSR / SSG
- i18n · 7 languages
- RTL (Arabic)
- Responsive design

The project is built on the **Next.js 16 App Router** architecture with Client Components ('use client') for all interactive modules. The entire codebase is written in strict TypeScript with zero compilation errors. Styling is delivered through a centralised **CSS custom properties token system** that enforces visual consistency across all pages. Deployment is triggered automatically on every commit to the **main** branch via Vercel.

• STRUCTURE

Application Architecture

LAYER	TECHNOLOGY / SOLUTION	PURPOSE
Routing	Next.js App Router	File-based routing, nested layouts, SSR / SSG
State	React useState / useCallback	Local state for forms, wizard steps, active language
Internationalisation	Custom i18n.ts	Dictionary of 300+ keys, 7 languages, tl() helper function
Design tokens	CSS Custom Properties	Unified token system: colours, spacing, typography

LAYER	TECHNOLOGY / SOLUTION	PURPOSE
Components	React Server / Client Components	TopNav, BlurOrbs and reusable UI blocks
Deployment	Vercel + GitHub Actions	Auto-deploy, edge CDN, preview environments

• DELIVERED MODULES

Functional Modules

The platform comprises five pages including four interactive tools. Each module is implemented as an independent React component with its own state management logic.

MODULE 01 · /

Landing Page

Corporate landing page with animated hero section, services block, case studies and a contact form.

- Hero section with CSS gradient animation and blur orb effects
- Services block — 6 cards with icons and descriptions
- Portfolio / case studies section
- About the company section with core values
- CTA block and contact form

MODULE 02 · /BRANDBOOK

Brandbook — Company Brand System

Complete visual and verbal identity documentation delivered as an interactive web page. Bilingual: RU / EN.

- Brand philosophy: mission, vision, 5 values
- Logo: clear space rules, permitted variants, 6 prohibited usages
- Colour palette: 8 colours with HEX / RGB / CSS variables and copy-to-clipboard
- Type scale: 6 levels with live previews
- Iconography, motion principles, brand voice with right/wrong example pairs
- Brand asset download section (PDF, Figma, PNG)

MODULE 03 · /CALC

Project Cost Calculator

Interactive multi-step wizard for estimating development costs. Prices displayed in British Pounds (£, en-GB locale).

- 7 sequential selection steps: project type, features, scale, design, platform, timeline, support
- Live price counter with animated real-time updates
- Result screen with itemised cost breakdown by category

- Full i18n support across all 7 languages

MODULE 04 · /BRIEF

Client Project Brief

Seven-step requirements intake form for project kick-off. Generates a structured brief with a unique reference number and date stamp.

- 7 steps: company details → project type → style → audience → budget → timeline → contacts
- Style tags (8 options) and audience tags (6 options), multi-select
- Unique brief reference number, localised date format (en-GB)
- Confirmation screen summarising all submitted responses
- Full i18n support across all 7 languages

MODULE 05 · /TRACKER

Project Tracker

Announcement page for an upcoming project management tool, featuring a full UI demonstration of planned functionality.

- Launch notification sign-up form
- Full UI mockup: sidebar navigation, sprint progress, milestone cards, activity feed
- 6 feature cards describing tracker capabilities
- Full i18n support across all 7 languages

• INTERNATIONALISATION

Multi-language i18n System

LANGUAGES

7

EN · DE · FR · RU · AR · HI · ZH

TRANSLATION KEYS

300+

Centralised i18n.ts, tl(key, lang) helper

RTL SUPPORT

Arabic

Mirrored CSS layout for AR locale

DEPLOYMENT

Vercel

Auto-deploy · Edge CDN · GitHub CI/CD
